

Rampage Products Front Euro Light Guard Set For Jeep JK 2Dr and 4Dr 07-

PARTS LIST

- 2 x Headlight guard
- 2 x Turn signal light guard
- 2 x Side reflector guard
- 4 x 1/2" Tec screw
- 4 x 3/4" Tec screw

PROCEDURE:

REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT. READ INSTRUCTIONS CAREFULLY.

Headlight installation:

- 1) Position the light guard onto the vehicles headlight with the top tab as shown in Fig 1. The tab should slide in between the grill fascia and the headlight.
- 2) Push the guard up against the headlight and use the tabs as guides for installing the 3/4" Tec screws into the grill shell. NOTE: The tabs may be bent slightly to center the guard on the grill shell as necessary, but be careful not to bend the tabs to far as they may break.
- 3) Repeat for other side.

Turn signal installation

- 1) Twist and remove the bulb and harness from the rear of the turn signal. Unsnap the two tabs from the mount on the fender and remove the turn signal assembly.
- 2) Position the guard on the front of the lens so that the bars are vertical when the assembly is reinstalled, see Fig 2. The small tabs will line up with the ribs on the side of the light assembly and should clip around the edge of the assembly to hold the guard tightly. See Fig 3.
- 3) Re-install the complete assembly back into the fender and re-install the light.
- 4) Repeat for other side.

Reflector installation

- 1) Position the guard over the fender reflector with the bars vertical to match the other guards. Be sure to center it on the reflector, NOTE: it can be bent slightly to fit the contour of the fender as required.
- 2) Use the guard as a guide to install the 1/2" Tec screws into the fender.
- 3) Repeat for other side.
