Bracket Installation:

Put on Safety Glasses. With the hood securely latched in place, locate the three T40 Torx bolts on both hood hinges and remove them using a T40

Torx bit and ratchet. (it may be necessary to score the paint around the bolts using a razor blade to prevent paint chipping.)

With the Factory bolts removed install the Driver and Passenger brackets as shown with the supplied M8 T40 Torx

bolts and nylon washers. Snug but do not fully tighten the bolts using a T40 Torx bit or key.

On the Passenger side of the light bar, install one of the M8 studs (supplied with Quadratec light bar) using a 4mm hex key. Also install one of the supplied spacers on the stud.

Fully tighten the hood fasteners at this point with a T40 key.

Adjust lightbar to the desired angle, then and tighten the nuts with a 13mm wrench.
