---------------	---

STEP 1 - ENTRY GUARD PREPERATION

Put on safety glasses. Remove any existing entry guards along with any prior guard adhesive. Thoroughly clean the entire entry guard threshold area with hot soapy water and a clean rag. Dry off sill area with a clean dry towel or chamois. Test fit entry guards to verify the proper location of each. Do not remove the adhesive tape at this moment. **NOTE:** each entry guard is mold marked on the back side with its proper location. (Fig 1) Clean threshold contact area with an alcohol prep pad. Remove one alcohol prep pad from its packet and wipe the entire contact area with the alcohol pad to remove wax and oils on the painted surface. This promotes adhesion. Repeat step for each opening where you will install an entry guard. (Fig 2)

STEP 2 - ENTRY GUARD INSTALLATION

Remove the adhesive backing from the front entry guard. Peel the plastic tape strip backing to reveal the adhesive surface. (Fig 3) Install front entry guards as shown below. **NOTE:** This adhesive tape is very aggressive and entry guard will not be repositionable once pressed into place. Carefully note the proper placement of the entry guard. Make sure the entry guard is completely inward as shown. Use downward pressure to engage the adhesive tape to the threshold. Repeat step for each entry guard position on your vehicle. (Fig 4)

INSTALLATION COMPLETE

Congratulations! Installation is now complete. Enjoy your new Quadratec® Entry Guards for your Jeep® Wrangler!
